**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Response to Amendment***

Receipt is acknowledged of applicant's amendment filed February 6, 2005.

Claims 1-10 are pending and an action on the merits is as follows.

Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the following ground of rejection.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hambrun et al. (U.S. 5,582,242) in view of Luo (U.S. 6,725,909).

Hambrun discloses a heat pipe comprising:

- a first lid; a second lid; and a hollow pipe member with two opposing open ends;
- each of the first and second lids includes an interlocking member along a periphery thereof and a flange extending radially and outwardly from the interlocking member, the flanges have a thickness smaller than that of a sidewall of the pipe member;
- the hollow pipe member includes a cylindrical pipe;

Art Unit: 3743

- the first lid comprises a filling tube mounted thereon;
- the filling tube includes a sealing portion.

Hamburgen's invention discloses all of the claimed limitations from above except for a wick attached to the interior sidewall; the first and second lids are formed by press process; the first and second lids include curved surfaces; the curved surfaces include recessed surfaces; the curved surfaces include protruding surfaces; the flanges have peripheries larger than an internal peripheral of the open ends; and the flanges have peripheries no larger than an external periphery of the heat pipe.

However, Luo teaches a wick (7) attached to the interior sidewall; the first and second lids include curved surfaces; the curved surfaces include recessed surfaces; the curved surfaces include protruding surfaces; the flanges have peripheries larger than an internal peripheral of the open ends; and the flanges have peripheries no larger than an external periphery of the heat pipe.

Given the teachings of Luo, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the heat pipe of Sarraf with for a wick attached to the interior sidewall; the first and second lids are formed by press process; the first and second lids include curved surfaces; the curved surfaces include recessed surfaces; the curved surfaces include protruding surfaces; the flanges have peripheries larger than an internal peripheral of the open ends; and the flanges have peripheries no larger than an external periphery of the heat pipe.

Doing so would improve the heat pipes thermal efficiency.

### ***Response to Arguments***

Applicant's arguments filed February 6, 2005 have been fully considered but they are not persuasive.

Applicant's states, the combination of Hambergen and Luo does not teach nor disclose the end surface structure disclosed in the present invention.

Hamburgen in view of Luo discloses the end structures of the applicant's claimed and disclosed invention.

### **Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
